**Subject: Notice of Survey Activity in Your Area**

We are writing to inform you about upcoming survey activity that will be taking place in your area. Our survey crew will be conducting a survey project in the vicinity. This work will not disturb your property or its surroundings in any way. This work is anticipated to be performed Monday, August 28 to September 7.

This survey aims to gather accurate geospatial data along the Souris River and Sundale Channel. We understand the importance of respecting the privacy and boundaries of property owners, and we want to emphasize that our team has been instructed to strictly adhere to ethical and professional surveying practices.

During surveying, our crew will use specialized equipment to collect data, such as GPS instruments and an Unmanned Aerial Vehicle. This equipment will not impact the land or structures; our team will remain within designated public spaces or legal access points. We are committed to maintaining a low impact on the community and ensuring our activities do not disrupt daily routines.

If you have any concerns or questions regarding this survey activity, please feel free to contact Chris deWinter at 306-861-7464 or GeoVerra's Project Manager, Greg Alwast, at [greg.alwast@geoverra.com](mailto:greg.alwast@geoverra.com) or 780-616-5525. We value open communication and want to address any inquiries you may have.

Sincerely,

A handwritten signature in blue ink that reads 'G Alwast'.

Greg Alwast  
National Manager, Aerial Imaging and Mapping
